

## Brexidol

M Rx F<sub>f</sub>

Chiesi Farmaceutici

Tablett 20 mg

(blekt gula, sexkantiga med skåra, 10,6 x 11,8 mm)

Antiflogistiskt med analgetisk och antipyretisk effekt

**Aktiv substans:**

Piroxikam

**ATC-kod:**

M01AC01

Läkemedel från Chiesi Farmaceutici omfattas av Läkemedelsförsäkringen.

## Miljöpåverkan

### Piroxikam

Miljörisk: Risk för miljöpåverkan av piroxikam kan inte uteslutas då ekotoxikologiska data saknas.

Nedbrytning: Det kan inte uteslutas att piroxikam är persistent, då data saknas.

Bioackumulering: Piroxikam har låg potential att bioackumuleras.

### Detaljerad miljöinformation

#### Environmental Risk Classification

##### *Predicted Environmental Concentration (PEC)*

PEC is calculated according to the following formula:

$$\text{PEC } (\mu\text{g/L}) = (A \cdot 10^9 \cdot (100-R)) / (365 \cdot P \cdot V \cdot D \cdot 100) = 1,37 \cdot 10^{-6} \cdot A \cdot (100-R)$$

$$\text{PEC} = 1,34 \times 10^{-3} \mu\text{g/L}$$

Where:

A = 9,8047 kg (total sold amount API in Sweden year 2021, data from IQVIA).

R = 0% removal rate (due to loss by adsorption to sludge particles, by volatilization, hydrolysis or biodegradation) = 0 if no data is available.

P = number of inhabitants in Sweden =  $10 \cdot 10^6$

V (L/day) = volume of wastewater per capita and day = 200 (ECHA default) (Ref.1)

D = factor for dilution of waste water by surface water flow = 10 (ECHA default) (Ref.1)

*Predicted No Effect Concentration (PNEC)*

Data not available

*Environmental risk classification (PEC/PNEC ratio)*

Risk of environmental impact of piroxicam cannot be excluded, since there is not sufficient ecotoxicity data available.

**Degradation**

Data not available

**Bioaccumulation**

Partitioning coefficient:

Log Pow = 3,06 (experimentally derived, unknown method) (Ref. 2)

Since log Pow < 4, the substance has low potential for bioaccumulation.
