

RotaTeq

MSD

Oral lösning

(Blekgul klar vätska som kan ha en rosa nyans)

Vaccin mot rotavirus, pentavalent, levande, reassortant

Aktiva substanser:

Rotavirus, G1 reassortant, levande

Rotavirus, G2 reassortant, levande

Rotavirus, G3 reassortant, levande

Rotavirus, G4 reassortant, levande

Rotavirus, P1 reassortant, levande

ATC-kod:

J07BH02

Läkemedel från MSD omfattas av Läkemedelsförsäkringen.

Miljöpåverkan

Rotavirus, G1 reassortant, levande

Miljörisk: Användning av vacciner bedöms inte medföra någon miljöpåverkan.

Detaljerad miljöinformation

According to the European Medicines Agency guideline on environmental risk assessments for pharmaceuticals (EMA/CMP/SWP/4447/00), vitamins, electrolytes, amino acids, peptides, proteins, carbohydrates, lipids, vaccines and herbal medicinal products are exempted because they are unlikely to result in significant risk to the environment (Ref. I).

Even though biomolecules, such as vaccines and hormones, are exempted they should still be regarded as biologically active.
