MR EF

Sanofi AB

Injektionsvätska, suspension, förfylld spruta
(färglös, opaliserande vätska)

Influensavaccin

Aktiva substanser:

Influensavirus A/Brisbane/02/2018 (H1N1)pdm09-liknande stam ...
Influensavirus A/Kansas/14/2017 (H3N2)-liknande stam (A/Kans...
Influensavirus B/Colorado/06/2017-liknande stam (B/Maryland/...
Influensavirus B/Phuket/3073/2013-liknande stam (B/Phuket/30...

ATC-kod:

J07BB02

Läkemedel från Sanofi AB omfattas av Läkemedelsförsäkringen.

Miljöpåverkan

Influensavirus B/Colorado/06/2017-liknande stam (B/Maryland/15/2016, NYMC BX-69A), spjälkat virus, inaktiverat

Miljörisk: Användning av vacciner bedöms inte medföra någon miljöpåverkan.

Detaljerad miljöinformation

According to the European Medicines Agency guideline on environmental risk assessments for pharmaceuticals (EMA/CHMP/SWP/4447/00), vitamins, electrolytes, amino acids, peptides, proteins, carbohydrates, lipids, vaccines and herbal medicinal products are exempted because they are unlikely to result in significant risk to the environment.

Even though biomolecules, such as vaccines and hormones, are exempted they should still be regarded as biologically active.

influensavirus B/Phuket/3073/2013-liknande stam (B/Phuket/3073/2013, vildtyp), spjälkat virus, inaktiverat

Miljörisk: Användning av vacciner bedöms inte medföra någon miljöpåverkan.
